

Company Profile

Fidelity Information Services KORDOBA GmbH (FIS KORDOBA) is a leading software and service company for the European banking market. It is a wholly owned subsidiary of Fidelity National Information Services, Inc. (NYSE:FIS), the world's largest global provider dedicated to banking and payments technologies. FIS KORDOBA customers obtain everything from high-quality standard software products and customizing and implementation to different outsourcing models and maintenance by one vendor. FIS KORDOBA thus offers products and services all along the added value chain and assumes the role of the general contractor project-specifically. The product portfolio includes solutions in the areas of core banking, securities business, ebanking, bank controlling and authorization/self-service device management. The company FIS KORDOBA, based in Munich, employs currently more than 350 employees.

FIS KORDOBA offers its customers an extensive portfolio:

- Development and maintenance of high-quality standard software products for the financial services sector
- Partner management for additional partner products within the framework of an integral application landscape for banks
- Differentiated outsourcing and operator models
- Professional services in solution business and system integration business

The central turning points and core issues in the product portfolio and service portfolio are the high-quality standard software products for the national and international financial services areas.

For over 30 years, well-known banks count on the modularly-constructed KORDOBA® core banking system that meets the needs of the different strategic orientations of the financial institutions. In the meantime, six out of ten direct banking accounts in Germany are smoothly processed by KORDOBA CORE24 day and night.

Further emphasis is laid on accounting core-neutral single applications in the areas of securities business, ebanking, bank controlling and authorization/self-serve device management.

All KORDOBA® products can be integrated into other existing application landscapes because they are platform-independent and possess a high scalability via standard interfaces.

Customer requirements are met using qualified, project-oriented consulting services and high performing, cost-optimized outsourcing and operator models. Our customers expect professional project management and in-depth banking business know how on a wide scale.
